The specificity of association with TG2 was evaluated by z-test analysis ($P \leq 0.05$) of $n=5$ animals per cohort, using the $TG2^{-/-}$ mice as background control (as outlined in Figure 3, A and B). Proteins are denoted by full name and UniProtKB protein entry name (ID), and they are listed according to the specificity of the interaction with TG2 (p-value). WT/APP23, TG2-associated proteins in both WT and APP23 brain (p-value listed is for WT); WT, TG2-associated proteins in WT brain; APP23, TG2-associated proteins in APP23 brain.
