

Supplementary Figure S3. Comparison of image analysis data between reactive hyperplasia (RH) and PCV2 or PRRSV. Quantitative analysis includes the area (expressed as percentage) of interfollicular lymphoid tissue occupied by CD20⁺ (a, d), CD3⁺ (b, e) or IBA1⁺ (c, f) cells. Statistical analysis was performed using Student's t-test for unpaired data. Significance: $p < 0.05$ (*), $p < 0.001$ (**).
