

Supplementary Table S4. Clinical success by indication for the index event of sepsis (univariate analysis).

	Indication: sepsis				
	No (n=448)	Yes (n=112)	Missing (n=1)	Total (N=561)	Univariate logistic model
Index infection considered as a clinical success by the investigator^a, n (%)					
No	100 (22.3)	46 (41.1)	0	146 (26.0)	<i>P</i> <0.001
Yes	348 (77.7)	66 (58.9)	1 (100)	415 (74.0)	

^aAnalysis includes only those with known status for clinical success; responses of ‘unknown’ are considered as missing data.
