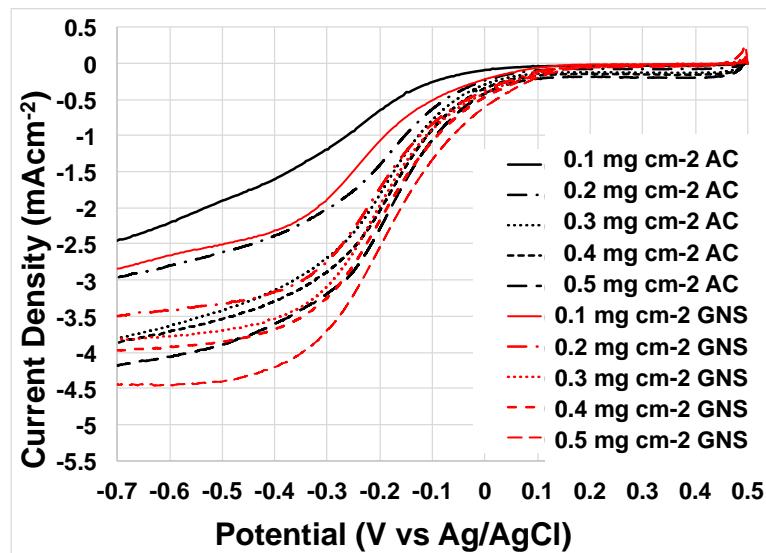

Figure S1. Disk current produced by AC (black) and 3D-GNS (red) in O₂ saturated PBS 0.1 M at a rotation rate of 1600 rpm. Loadings of 0.1, 0.2, 0.3, 0.4 and 0.5 mg cm⁻² were tested.

Table 1. Half wave potential for AC and 3D-GNS catalyst at loading of 0.1, 0.2, 0.3, 0.4 and 0.5 mg cm⁻².

catalyst loading (mg cm ⁻²)	E _{1/2}	
	AC	3D-GNS
	V (vs Ag/AgCl)	
0.1	-0.30	-0.26
0.2	-0.35	-0.22
0.3	-0.22	-0.20
0.4	-0.21	-0.19
0.5	-0.20	-0.16

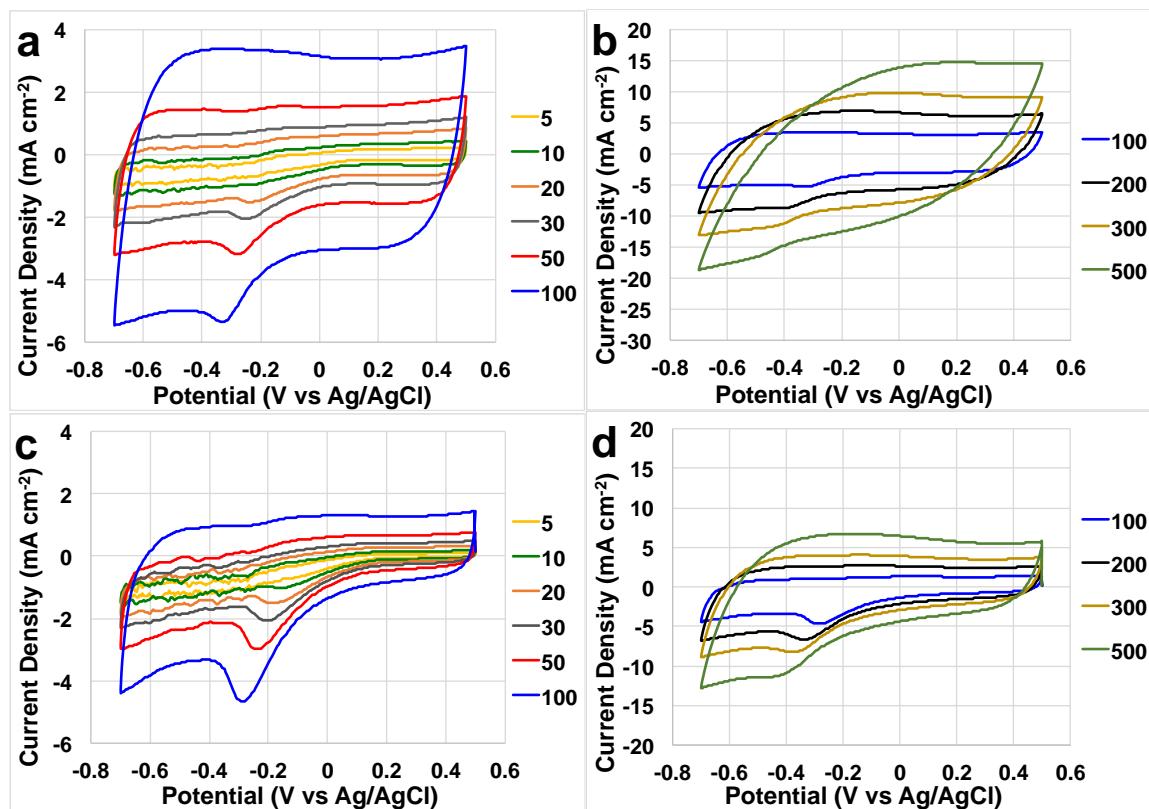

Figure S2. CVs from 0.5 V (vs Ag/AgCl) to -0.7 V (vs Ag/AgCl) at different scan rate for AC (a and b) and 3D-GNS (c and d).
