

	ChT N=34	ChT-ICI N=11
Multisite Progression	20 (59%)	3 (27%)
Mixed Response	1 (3%)	0 (0%)
Oligoprogression	4 (12%)	1 (9%)
Unknown	9 (26%)	7 (64%)

Supplementary Table 1. Pattern of progression to second line ChT with or without ICI. The pattern of progression was known for 29 out of 45 patients (64%). Abbreviations: ChT, Chemotherapy; ICI, Immune-checkpoint inhibitor; N, Number.

Supplementary Figure 1 . Best response to second-line ChT or or ChT-ICI, investigator-assessed by RECIST 1.1. Abbreviations: N, Number; PD, Progressive Disease; PR, Partial Response; SD, Stable Disease.
