* RB: Result based; CO: Collective implementation; VC: Value chain We collected data from 61 case studies, 17 case studies dropped out for the further analysis due several reasons: we excluded cases (i) which were clearly stated as failure, due to low number of participants or no successful implementation; (ii) which did not include any of the three new contract types, representing e.g. cases of action-oriented approaches, or land-tenure cases, (iii) where no real "contract conclusion" was apparent (vi) as well as cases collected from outside Europe.
