

## **Tissue miRNA 483-3p expression predicts tumor recurrence after surgical resection in histologically advanced hepatocellular carcinomas**

### **SUPPLEMENTARY MATERIALS**

**Supplementary Table 1: Significant miRNA expression levels in recurrent and non-recurrent HCCs.** The table lists the raw data used to calculate the miRNA expression levels in recurrent and non-recurrent HCC. Final values are expressed as fold-increase (RQ) and obtained with the  $2^{-\Delta\Delta CT}$  equation. Only significant RQ differences are listed.
