Data set Documentation

Abstract

The main folder of the dataset, FISCUS_documents_20250206, is divided into twenty-three sub-folders; each of them contains the .xml files with the text of the medieval

funded by the Italian Ministry of University and Research via the PRIN funding scheme 2017 under Project N. 2017EMJHKJ_002

documents that have been marked up by the authors and/or the contributors of the database FISCUS. One will also find the folder named FISCUS_authority-list_20250206, which is made of five sub-folders. Each of those includes the data related to one specific category of objects which were regarded as particularly important for the study of fiscal estates during the early and the central Middle Ages: namely, the landed estates and the jurisdictional ambits in which fiscal properties and/or the exertion of public rights is recorded; the juridical persons (churches, monasteries and urban communes) mentioned in the documents; the people and the places which appear in our documentary record; and finally the list of keywords (thesaurus).

[Provide useful info regarding file conversion etc... (Optional)]

Please indicate instruction/technical info in order to allow potential users to correctly visualize and reuse your data (e.g. specific software, ...).

In case of data converted in open formats it could be useful to provide some further information. For example if you deposit for long term preservation a .csv file derived from an excel you can describe the conversion. Here is an example of description of conversion using libre office calc software:

To create the .csv files, "LibreOffice Calc" version: 5.1.4.2 (portable) was used, with the following specifics:

- Character set *Europa occidentale (Windows-1252/WinLatin1)*
- Field delimiter « , » (comma)
- Text delimiter « " » (quotes)]
