

(a) other Archaeplastida

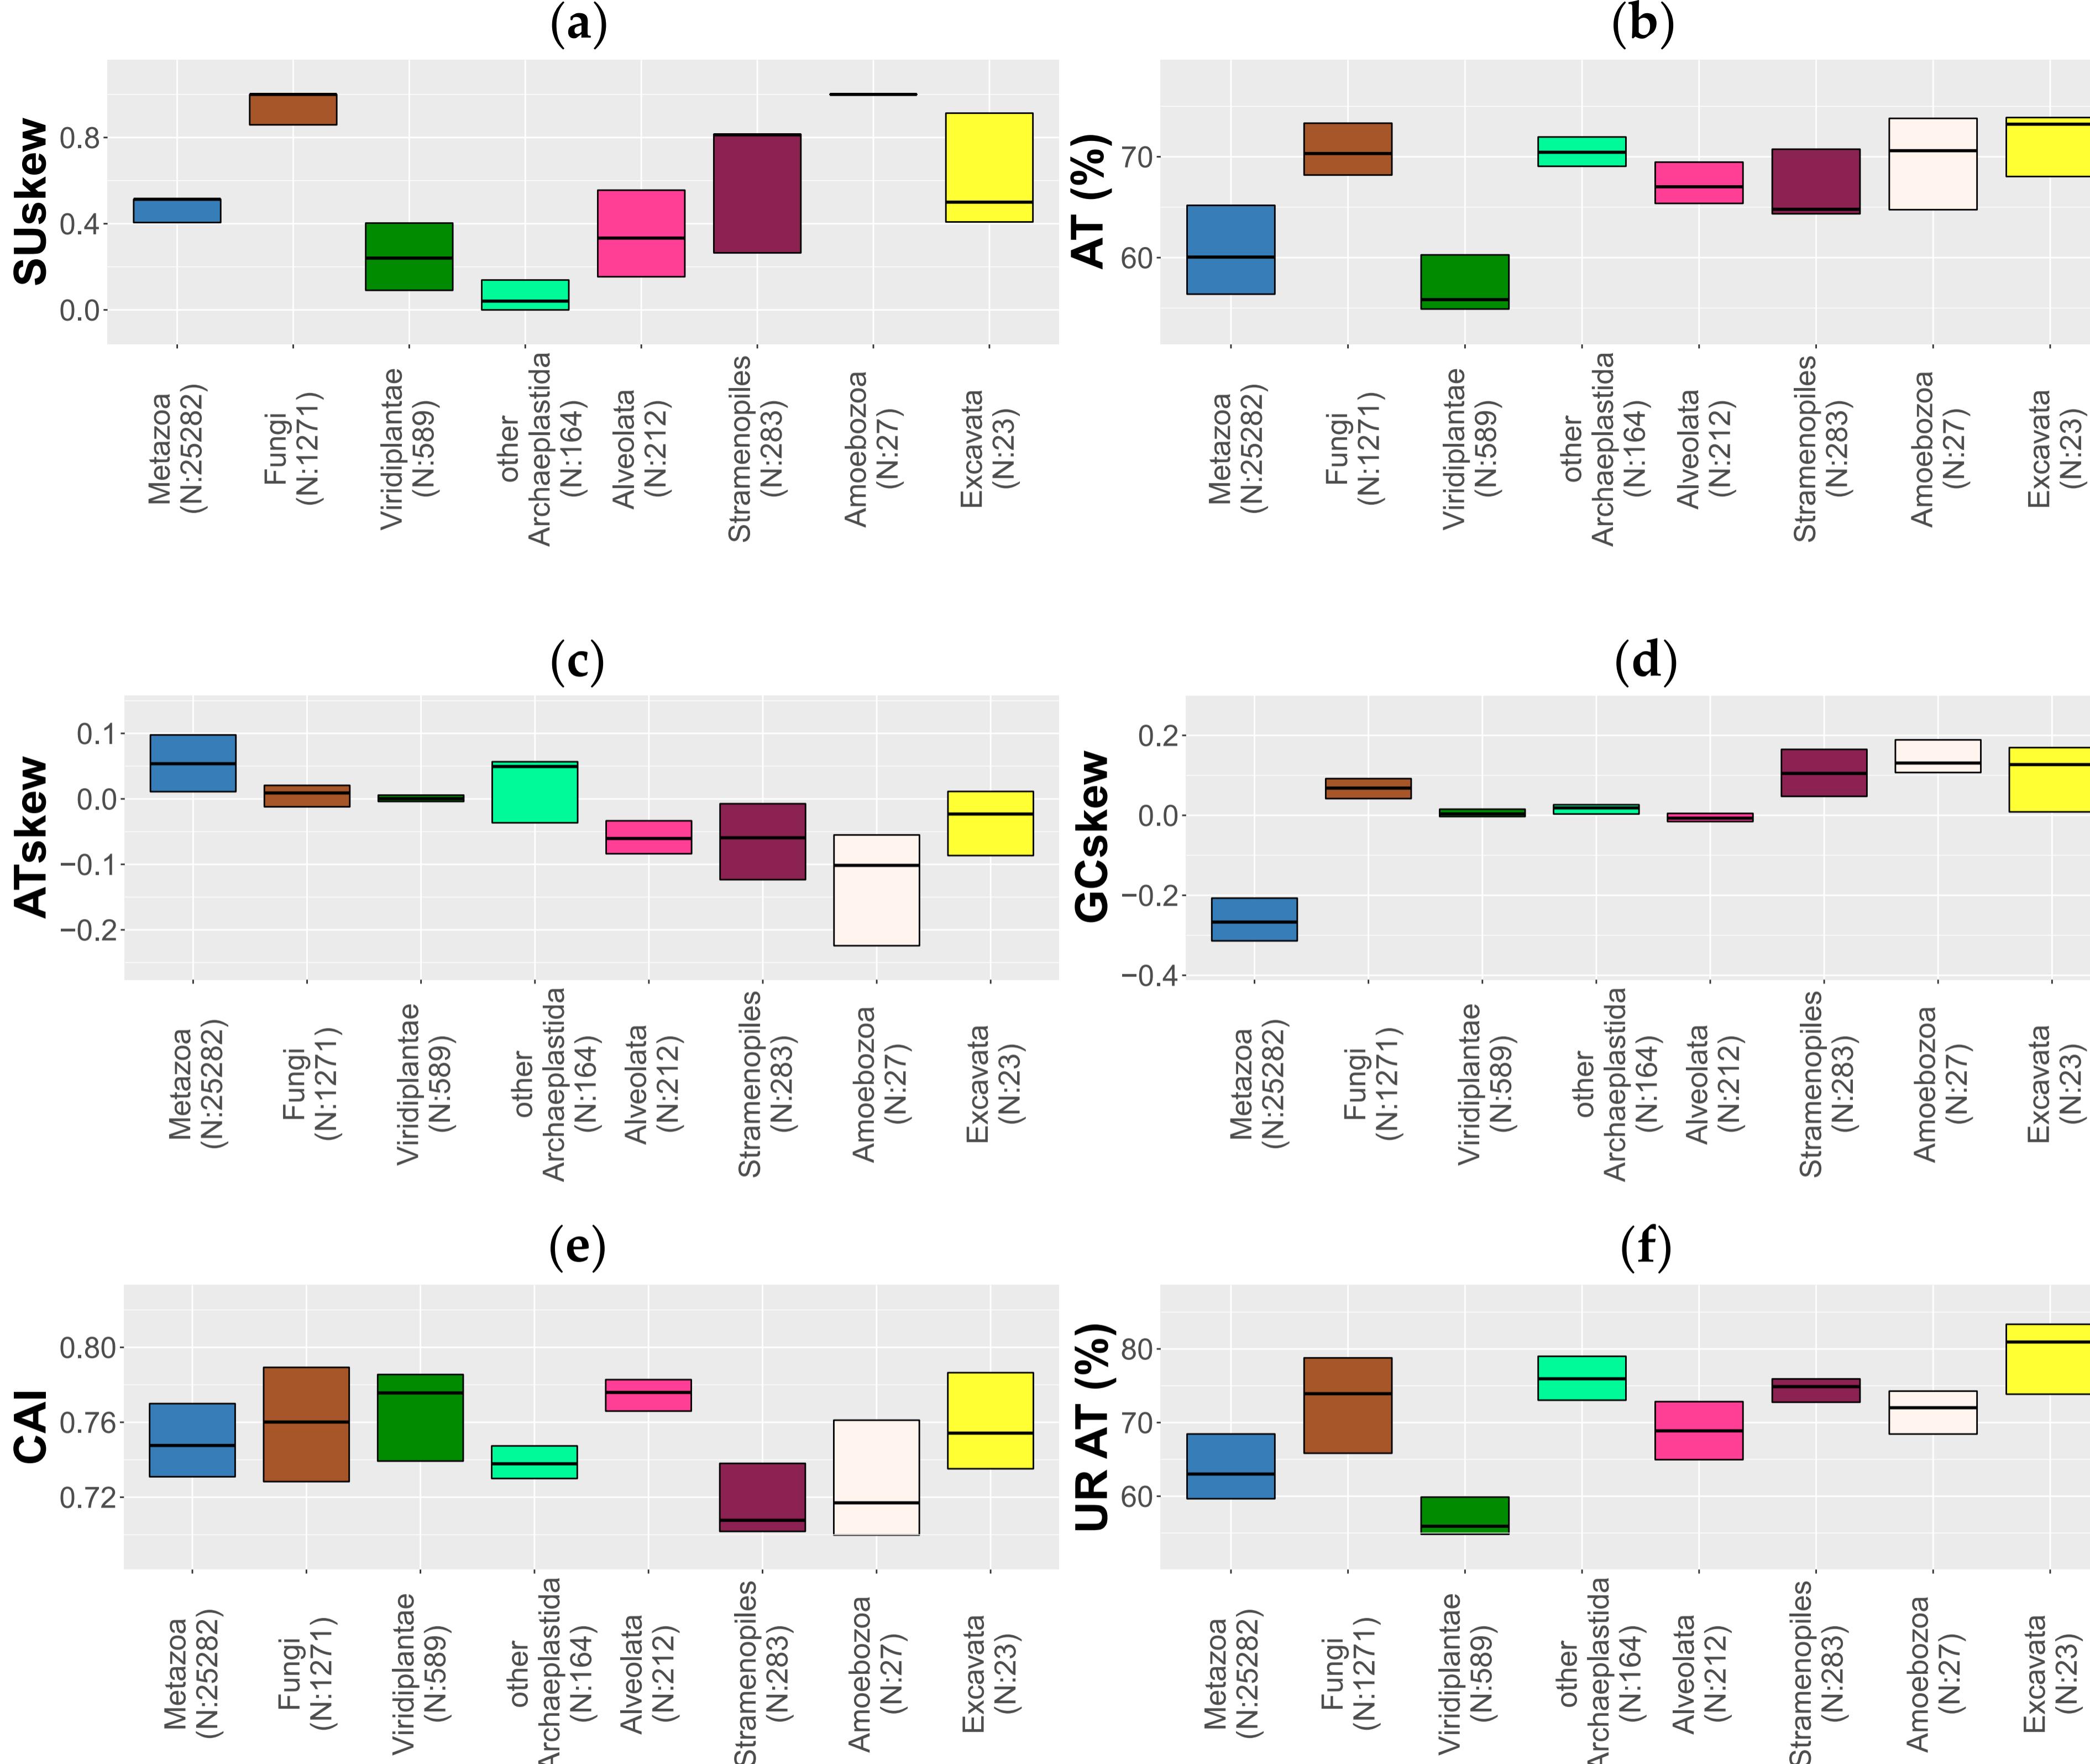

(b) Amoebozoa

(c) Excavata

Supplementary Figure S1. Correlograms for major mtDNA features. Each pie chart represents the value of a significant Spearman's rho; where the pie chart is not shown, the correlation is not significant. A blue pie shows a positive Spearman's rho, increasing clockwise from 0 to 1; a red pie shows a negative Spearman's rho, increasing counterclockwise from 0 to 1. (a) Archaeplastida excluding Viridiplantae; (b) Amoebozoa; (c) Excavata.

Supplementary Figure S2. Nucleotide composition and strand asymmetry. The thick line depicts the median value; the boxplot ranges from the first to the third quantile. (a) SU-skew; (b) AT (%); (c) AT-skew (%); (d) GC-skew; (e) CAI; (f) UR AT (%).

Supplementary Table S1. Manually excluded species and relative selected GenBank Accession Numbers.

Species	Phylum	Selected ID
<i>Anopheles gambiae</i>	Arthropoda	MG753766.1
<i>Balaenoptera physalus</i>	Chordata	MT410921.1
<i>Bos taurus</i>	Chordata	MN714217.1
