

Table S1. Number of daily asthma referrals to the PED in 2020 and in the time period 2015-2019, average \pm SD (standard deviation) and percentage of high-priority codes (0, 1, 2 or >2), on a monthly basis. *P* values are based on t-tests and Chi-square test as appropriate. For categorical variables we used the chi-square test when frequencies \geq 5, while we used standardized residuals when $<$ 5.
