

Supplementary Table 1. TKI availability outside clinical trials in the participating countries

<b>Country</b>	<b>Chronic phase</b>	<b>Blast phase</b>
Armenia	From first line: Imatinib	First line: Imatinib
	From second line: Nilotinib	Second line: Nilotinib
	From third line: Ponatinib	Third line: Ponatinib
	Not available: Dasatinib, Bosutinib, Asciminib	Not available: Dasatinib, Bosutinib, Asciminib
Austria	From first: Imatinib, Dasatinib, Nilotinib, Bosutinib	First line: Imatinib, Dasatinib, Nilotinib, Bosutinib
	Resistant or intolerant to Dasatinib or Nilotinib: Ponatinib	Resistant or intolerant to Dasatinib or Nilotinib: Ponatinib
	T315I any line: Ponatinib	T315I: Ponatinib
	After two TKI: Asciminib	After two TKI: Asciminib
Czech Republic	From first line: Imatinib, Dasatinib, Nilotinib	All lines: Imatinib, Dasatinib, Nilotinib, Bosutinib, Ponatinib
	From second line and after special permission for health insurance company: Bosutinib	
	From third line: Ponatinib	
	T315I any line: Ponatinib	
	From third line and after special permission for health insurance company: Asciminib	
France	From first line: Imatinib, Nilotinib, Bosutinib	All lines: Imatinib, Dasatinib, Nilotinib, Bosutinib, Ponatinib
	From second line: Dasatinib	
	From third line: Ponatinib, Asciminib (not for T315I)	
	T315I any line: Ponatinib	
Germany	From first line: Imatinib, Dasatinib, Nilotinib, Bosutinib	No previous therapy with TKI: Imatinib, Dasatinib, Bosutinib
	From third line: Ponatinib, Asciminib	Previous therapy with TKI: Imatinib, Dasatinib, Nilotinib, Bosutinib, Ponatinib
	T315I any line: Ponatinib	

Italy	From first line: Imatinib, Dasatinib, Nilotinib, Bosutinib	From first line: Imatinib
	Patients resistant/intolerant to Dasatinib and/or Nilotinib: Ponatinib	Patients resistant/intolerant to Imatinib:Dasatinib
	From third line: Asciminib	Patients resistant/intolerant to at least one TKI: Bosutinib
	T315I any line: Ponatinib	Patients resistant/intolerant to Dasatinib and/or Nilotinib: Ponatinib
		T315I any line: Ponatinib
Poland	From first line: Imatinib	Any line: Imatinib, Dasatinib, Bosutinib, Ponatinib
	From second line: Dasatinib, Nilotinib, Bosutinib	
	From third line: Ponatinib,	
Russian Federation	From first line: Imatinib	Any line: Imatinib, Dasatinib
	From second line: Dasatinib, Nilotinib, Bosutinib	
	Managed access program: Asciminib	
Slovenia	From first line: Imatinib, Dasatinib, Nilotinib	From first line: Imatinib, Dasatinib, Nilotinib
	From second line: Bosutinib, Ponatinib	From second line: Bosutinib, Ponatinib
Spain	From first line: Imatinib, Dasatinib, Nilotinib, Bosutinib	No previous therapy with TKI: Imatinib, Dasatinib, Bosutinib
	From third line: Ponatinib, Asciminib	Previous therapy with TKI: Imatinib, Dasatinib, Nilotinib, Bosutinib, Ponatinib
	T315I any line: Ponatinib	T315I any line: Ponatinib
Sweden	From first line: Imatinib, Dasatinib, Nilotinib, Bosutinib	No previous therapy with TKI: Imatinib, Dasatinib, Bosutinib
	From third line: Ponatinib, Asciminib	Previous therapy with TKI: Imatinib, Dasatinib, Nilotinib, Bosutinib, Ponatinib
	T315I any line: Ponatinib	T315I any line: Ponatinib

\* from first line refers only to patients diagnosed with de novo blast phase. Patients whose blast phase is an evolution of a previous chronic phase are automatically considered from second line (according to the number of chronic phase therapies received).

Supplementary Table 2. Characteristics of patients with atypical *BCR::ABL1* transcript

	<b><i>BCR::ABL1</i></b>	<b>Age at onset of BP (years)</b>	<b>Phase CML at diagnosis (CP vs BP)</b>	<b>Morphology /Phenotype</b>	<b><i>BCR::ABL1</i> Mutations</b>	<b>CNS/EM involvement</b>
1	<b>e1a2</b>	40	BP	Lymphoid	No	No
2	<b>e1a2</b>	44	BP	Lymphoid	No	Yes
3	<b>e1a2</b>	57	BP	Lymphoid	No	Yes
4	<b>e1a2</b>	67	CP	Myeloid	Yes	No
5	<b>e1a2</b>	62	CP	Lymphoid	No	No
6	<b>e1a2</b>	48	BP	Myeloid	No	No
7	<b>e1a2</b>	26	BP	Myeloid	No	No
8	<b>e6a2</b>	74	BP	Myeloid	No	Unknown
9	<b>e8a2</b>	76	CP	Unknown	No	No
10	<b>e19a2</b>	53	BP	Myeloid	No	Yes
11	<b>e19a2</b>	54	BP	Myeloid	No	No
12	<b>e13a3</b>	60	BP	Lymphoid	No	No

CML: chronic myeloid leukemia; CP: chronic phase; BP: blast phase; Y: yes; N: no; CNS: central nervous system; EM: extramedullary manifestation(s)

Supplementary Table 3. Type of treatment administered for first treatment of CML-BP

Treatment combinations	N (=232)	N (=145)	N (=87)
		(secondary BP)	( <i>de novo</i> BP)
TKI+Ctx+alloSCT	35 (15.1%)	23 (15.9%)	12 (13.8%)
TKI+alloSCT	10 (0.4%)	7 (4.8%)	3 (3.4%)
TKI+Ctx	99 (42.7%)	55 (37.9%)	44 (50.6%)
TKI alone	49 (21.1%)	31 (21.4%)	18 (20.7%)
TKI+HMA	0	0	0
TKI+HMA+alloSCT	0	0	0
TKI+HMA+alloSCT+Ctx	0	0	0
Ctx alone	32 (13.8%)	22 (15.2%)	10 (11.5%)
Ctx+alloSCT	2 (0.9%)	2 (1.4%)	0
alloSCT alone	3 (1.3%)	3 (2.1%)	0
Best supportive care	2 (0.9%)	2 (1.4%)	0
<b>Type of TKI</b>	<b>N</b>		
Dasatinib	75	52	23
Ponatinib	31	31	0
Imatinib	62	13	49
Nilotinib	19	15	4
Bosutinib	4	3	1
Others*	2	2	0

CML-BP: chronic myeloid leukemia blast phase; TKI: tyrosine kinase inhibitor; Ctx: chemotherapy; alloSCT: allogeneic stem cell transplantation; HMA: hypomethylating agents

\*Others: midostaurin (n = 1), unknown (n=1)

Supplementary Table 4. Type of treatment administered for CML-BP in all treatment lines

Treatment combinations	N	N	N
		(secondary BP)	( <i>de novo</i> BP)
TKI+Ctx+alloSCT	109	65	44
TKI+alloSCT	12	8	4
TKI+Ctx	69	36	33
TKI alone	26	19	7
TKI+HMA	1	1	0
TKI+HMA+alloSCT	1	1	0
TKI+HMA+alloSCT+Ctx	6	6	0
Ctx alone	9	9	0
Ctx+alloSCT	3	2	1
alloSCT alone	2	2	0
Best supportive care	2	2	0
<b>Type of TKI</b>	<b>N</b>		
Dasatinib	133	76	57
Ponatinib	95	69	26
Imatinib	80	19	61
Nilotinib	46	30	16
Bosutinib	19	13	6
Others*	16	13	3

CML-BP: chronic myeloid leukemia blast phase; TKI: tyrosine kinase inhibitor; Ctx: chemotherapy; alloSCT: allogeneic stem cell transplantation; HMA: hypomethylating agents

\*Others: asciminib (n = 14), PF-114 (n = 1), midostaurin (n = 1)
