Supplementary Figure S2 Boxplot of urinary NGAL by AKI phenotype

Solid bold line represents median. Lower and upper limits of box represent 25th and 75th quartiles, respectively. Level of significance: $p < 0.001$ (Kruskal-Wallis test).

Supplementary Figure S3 Probability of 90-day transplant-free survival by AKI phenotype in patients with persistent AKI $\geq 1B$ by day 3

Level of significance: $p=0.003$ (log rank).

** Available in 102/114 AKI episodes: 18/21 hypovolemia-induced, 41/48 ATN, 13/15 miscellaneous, 30/30 HRS-AKI,

Continuous variables are presented as median [p25-p75], categorical as n (%).

Statistical significance using Fisher's exact test, Mann-Whitney U test or Kruskal Wallis test, as appropriate. ATN, acute tubular necrosis; CKD, chronic kidney disease; CRP, C-reactive protein; HCV, hepatitis C virus; HRS-AKI, hepatorenal syndrome-acute kidney injury; INR, international normalized ratio; MELD, model for end-stage; Na, sodium; MASLD, metabolic-associated steatotic liver disease; uNGAL, urinary neutrophil gelatinase-associated lipocalin; WBC, white blood count.

Supplementary Table S3 Multivariate Cox hazards regression analysis for predictors of 90-day mortality

| | HR (95%CI) | p value |
|--------------------------------|-------------------------|----------------|
| MODEL 1 ^a | | |
| Age | 1.05 (1.01-1.09) | 0.007 |
| MELD-Na | 1.14 (1.08-1.21) | <0.001 |
| ATN phenotype ^b | 3.09 (1.37-6.97) | 0.006 |
| HRS-AKI phenotype ^b | 4.19 (1.79-9.83) | 0.001 |

| MODEL 2 ^a | | |
| Age | 1.07 (1.02-1.11) | 0.002 |
| MELD-Na | 1.14 (1.08-1.20) | <0.001 |
| uNGAL | 1.0002 (1.00006-1.0003) | 0.023 |

ATN, acute tubular necrosis; MELD, model for end-stage; Na, sodium; OR, odds ratio; HR, hazard ratio. Statistical significance using likelihood ratio test.

^a 139 patients included in Model 1, 82 in Model 2 (due to fewer patients with uNGAL measured on day 3). Of the 82 patients with uNGAL, 7 no longer had AKI \geq 1B on day 3, but the uNGAL had been drawn prior to serum creatinine becoming available.

^b Using hypovolemia-induced AKI as reference group.
