

Supplementary 6. Comparison of hematological recovery in intention to treat analysis between dogs treated with glucocorticoid monotherapy and combined protocols. Data reported the number of dogs that have reached the outcome (partial response or complete response).

<b>Timepoint</b>	<b>M-group n = 16</b>	<b>MC + MM-group n = 27</b>	<b>P value</b>
T14 (number of dogs)	2/16	1/27	.27
T30 (number of dogs)	4/15	6/26	.79
T60 (number of dogs)	4/15	14/26	.09

M-group, methylprednisolone therapeutic group; MC-group, methylprednisolone and cyclosporine therapeutic group; MM-group, methylprednisolone and mycophenolate mofetil therapeutic group; T14, 14 days after inclusion in the study; T30, 30 days after inclusion in the study; T60, 60 days after inclusion in the study
